

Windows Fundamentals 1:- (We'll start our journey learning about windows desktop, NTFS file system, VAC the Control panel and more)

Task 1:- Windows Editions

The windows OS has long history dating back to 1985, and currently its dominating OS in both home use and corporate networks. Because of these, windows has always been targeted by hackers and malware writers.

→ 2001
Windows XP has been popular windows for long time. Then Microsoft announced windows vista. There are many issues with windows vista. It wasn't received well by windows users, and it was quickly phased out.

→ 2009
Then windows 7, as quickly it was released soon after, was marked with the end of support date. Then 2012 windows 8.1 came and left and it was short lived like vista.

→ 2013
Then arrived windows 10 followed by windows 11. which is current windows operating system.

→ 2021
Windows 11 comes in 2 flavors, Home and pro.

Even though we didn't talk about Servers, the current version of windows operating system for Servers is windows Server 2025.

Note:- The windows edition for attached VM is windows Server 2019 Standard as seen in system information.

Update:- As 2021 June, Microsoft announced retirement dates for windows 10 here -
As of October 2021, 5th windows 11 now current windows operating system for end users.

Windows Hello	✓	✓

BitLocker

Task 2:- Desktop GUI

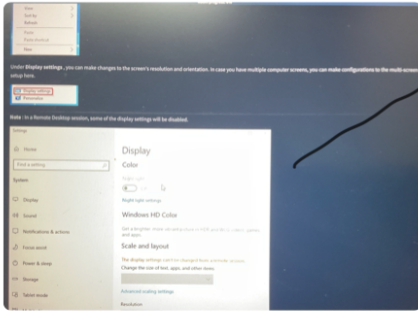

The windows Desktop, aka the graphical user interface (GUI), is screen that welcomes once you log in windows 10 machine.

Traditionally, you need to pass login screen first. The login screen is where you need to enter valid account credentials, usually a username and password of preexisting windows account.

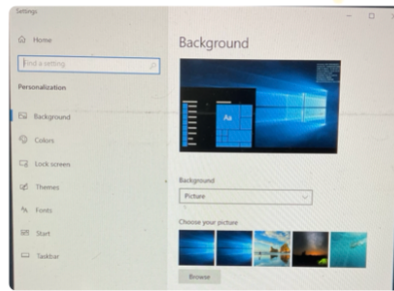

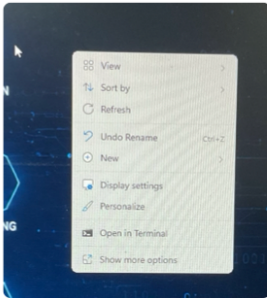

i) **The Desktop**:- The Desktop is where you will have shortcuts to programs, folders, files etc. These icons will either be well organized in folders sorted alphabetically or scattered randomly with no specific organization on desktop. In either case, these items are typically placed on desktop for quick access.

The look and feel of desktop can be changed to suit your liking. By rightclicking anywhere on desktop, a context menu will appear. This menu will allow you to change sizes of desktop icon, specify how you want to arrange them, copy/paste items to desktop, create new items, such as folder, shortcut or text document.

→ Display Settings we can modify Brightness and color-scan and layout and Related Settings.

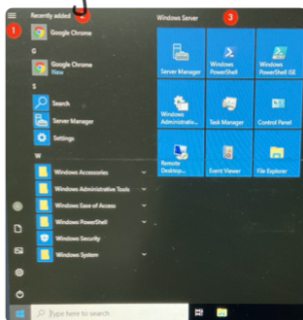

* You can change wallpaper by selecting **personalize**.

a) The Start Menu :-

In previous version of windows, the word Start was visible at bottom left corner of desktop GUI. In modern version of windows, such as windows 10, The word 'start' doesn't appear anymore, but rather windows logo is shown instead. The Start Menu provides access to all apps/programs, files, utility tools etc. that are most useful.

Clicking on windows logo, the Start menu will open. The Start menu is broken up into sections.

1) The section of Start menu provide quick shortcuts account or login session. Making changes to user account, lock your screen, or signing out of your account.

2) The section will show all **Recently Added** apps or programs at top and all installed apps/programs.

3) The right side of Start menu where you will find pinned or favorite programs/apps.

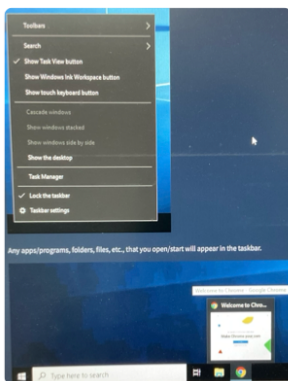

or utilities. These icons are known as files. Some files are added to section by default.

The Task Bar :-

Some of components are enabled and visible by default. The toolbar(6) was enabled for demonstration purposes.

If you like me and want to disable some of these components, you can right click on Task bar to bring up context menu that will allow you to make changes.

Any App / Programs, folders, files etc that you open / Start will appear in task bar.

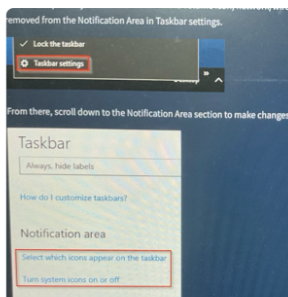

Hovering over icon will provide a preview thumbnail, along with a tooltip.

When you close any of these items, will disappear from taskbar.

The Notification Area :-

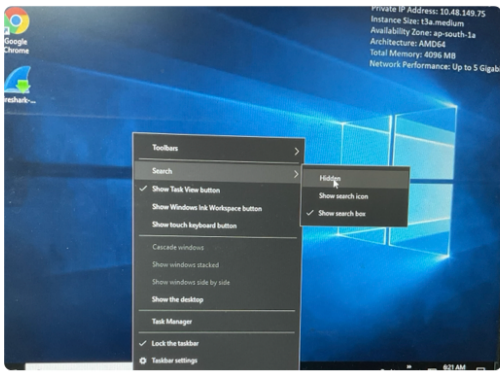

The Notification Area, which is typically located at bottom right of windows screen, is where date and time are displayed. Other icons possibly visible in this area is Volume icon, network/wireless icon, to name a few. Icons can be either added or removed from the Notification area in task bar settings.

Ques:-
